

Research Seminars: CUW is committed to providing outstanding advisory help and assistance as you embark upon your doctoral journey. Moreover, we seek to help you complete this program in the most efficient and meaningful manner possible. Furthermore, your Dissertation will require specific research guidance which will be unique to your research question and project. To that end, you must register and take nine, one-credit Research Seminars throughout your program journey (approximately once every eight to twelve weeks—see Course Sequence document for more detail). You may progress through the Research Seminars as expeditiously as you wish, pending approval and grade completion by your Dissertation Chair. The following gives a general outline and checklist as to what will be expected and required of students in each Dissertation Research Seminar:
