Attendance

- Attendance is recorded when a discussion or assignment is posted.
- Login at least 5 times per week.

Payment

- Students are emailed an invoice
- Payments are made online
- Concordia processes invoices for state funded students.

5

Course Description:

Intro to pharmacy is an online, introductory course intended for undergraduate students who are interested in the profession of pharmacy, regardless of previous experience in the profession. This course is designed to help you understand the progressive world of pharmacy and the profound impact pharmacists have on patient care. Whether you are considering pharmacy as a potential career path or are just interested in the subject, this course will open your eyes to the exciting profession of pharmacy. This course will introduce you to the history of pharmacy, the pharmacist's and technician's role in patient care, drug discovery, pharmacy law, and many other important pharmacy topics.
1 credit hour.

Grading

The assessments for this course are being revised.
The gradebook categories will be posted in the course syllabus.

Learner Objectives:

1. Discuss historical background of the profession of pharmacy
2. Describe the role of the pharmacist in multiple unique practice settings
3. Describe the role of the pharmacy technician
4. List the 5 rights of medication delivery
5. Explain the process of drug discovery and development
6. Understand the basics of pharmacy law
